

Apache Event Center

Lawton, OK

Integrity Built

The Apache Event Center was constructed as a destination venue for inspiring additional business opportunities, and to relocate previously displaced operations personnel back into the main building campus from temporary offices. The complete program consists of an event center, facilities management offices and technical work areas, business operations offices and training spaces, as well as a large breakroom and kitchen servery for events.

The phased construction started with an interior remodel, followed by structural additions to the existing occupied building. Dust control, sound management, labor routing and access were carefully planned and coordinated for each of the multiple phases to ensure minimal impact on the owner's ongoing operations, while protecting the general public and making sure their experience was not hindered in any way.

The project incorporated specialized products and high-end finishes, many with long lead times. We scrutinized our schedule and updated it regularly to ensure that the materials specified for the project arrived onsite as required, as replacement of materials was not feasible with the fast-paced schedule.

Client - Fort Sill Apache Tribe of Oklahoma

Architect - Bergman Walls & Associates

Construction Cost - \$22.5 Million

Project Size - 85,000 SF

Loeffler Role - Preconstruction, Construction Manager
