

Valley Natural Meats

Northfield, MN

Integrity Built

Design/Build renovation to create an organic-certified meat processing plant and 4,000 SF holding barn on a 16 acre parcel. The plant manufactures specialty, smoked and cured meats, jerky, hams and sausages for wholesale and retail customers alike. To support the sustainable efforts of this coop manufacturer, this project included LED lighting to replace existing fluorescent fixtures, efficient hydronic heating and cooling improvements as well as replacement compressors and evaporators.

Automated controls were updated to control the improved refrigeration equipment. This project positioned the offerings of Valley Natural Meats, a subsidiary of Valley Natural Foods for sustainable farming practices with humanely raised, grass and organic grain produced meats that are USDA certified.

Client - Valley Natural Meats

Architect - D.J. Medin

Construction Cost - \$429,000

Project Size - 4,400 SF plus 4,000 SF holding area

Loeffler Role - Design Builder
